COVID-19 'Return To Work' Risk Assessment & Control Plan Service

You are already aware of the Government's decision to ease some of the COVID-19 restrictions with a view to carefully manage a kick-start of the economy. To assist in this, the Government has issued a set of workplace guidance publications for organisations to adopt as part of their return to work protocols and risk management of the COVID-19 hazard. However, the guidance is only a framework and its interpretation in the rail industry can be ambiguous. Getting it wrong, more than ever, cannot be an option.

That's why Force Four now offer a COVID-19 Return To Work Risk Assessment & Control Plan for RISQS members that features the six key factors that will ensure that you get it right.

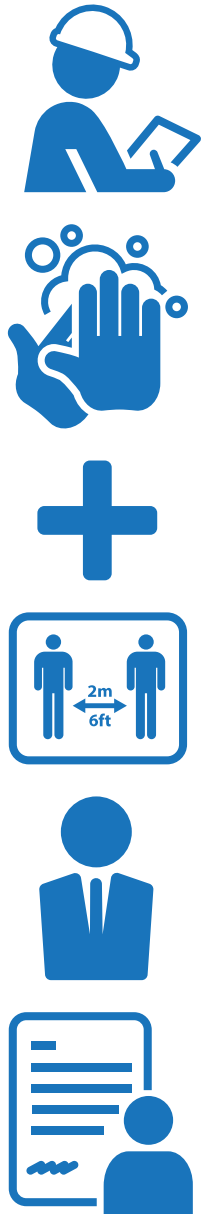

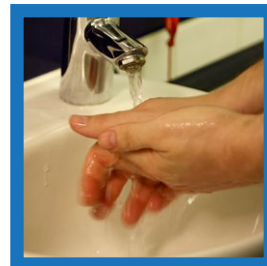

Our service, provided by experienced industry professionals, includes:

- Return to Work Risk Assessment & Control Plan development or review
- Workplace procedure change management reviews, including social distancing, PPE, health surveillance, control measures etc
- Health, physical & mental health and wellbeing in association with Mind.
- Communication and information (full design & implementation of distancing signage and 'sneeze guards', full site comms audits, staff briefings, revised inductions including film inductions)
- Leadership and stakeholder engagement, full engagement plan design & deployment, damage limitation plans
- Assurance statement by IOSH/NEBOSH accredited experts for total peace of mind

COVID-19 Return to Work Training

Dubbed by leading HSE professional as "the biggest Behavioural Safety challenge ever", getting all of your teams aligned to the new way of working safely with COVID-19 is going to test any HSE professional.

We've blended all of the current guidance and best practice from Government, HSE.gov, British Safety Council and our own Behavioural Safety Training experts to produce training frameworks for all your teams that focus on the new behaviours required to successfully implement your COVID-19 Return to Work Risk Assessment and Control Plan.

HSE Policy Manuals, Communications & Signage

We help HSE professionals to create and publish cohesive suits of technical HSE policy documents, creatively designed to be engaging to the reader, and duly compliance checked by our specialists.

We also design, produce and deploy complete HSE visual communications campaigns which includes full HSE and 'wayfinder' signage schemes.

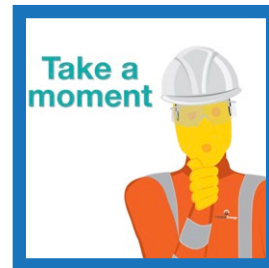

Why not try our free 'HSE Site Comms' audit to find out how you can reduce costs and increase your visual communications efficiency.

HSE Film & Animation

Essential to onboarding into a good safety culture, our induction films enable you to induct new employees and contractors in a consistent and engaging way. We can also fully automate the induction process online with our [StartSafe™ Online Inductions Portal](#), so contractors and new staff can be inducted before they attend site and commence work.

Our RISQS accredited, award winning film crew are experts in producing induction films for high-risk industries, on all topics of Health & Safety from confined space and PPE to excavations and manual handling.

Learn more about how we combine our award winning creative studio and professional safety experts to create engaging, memorable and impactful safety inductions for all.

RISQS buyers receive a 20% discount on their first three projects
